Internship (April 2023 - June 2023)

I completed an internship as a backend developer for 3 months.

During this time, I focused on following technologies like HTML, CSS, PHP, Laravel and SQL.

EDUCATION

Bishop Heber College, Trichy — *(MCA)*

June 2019 - April 2022

Master of Computer Application.

Urumu Dhanalakshmi College, Trichy — *(B.Sc.,)*

June 2016 - April 2019

Bachelor of Science (Computer Science).

PROJECTS

Ambulance Notification

A web page with GPS technology will be utilized by the user to send coordinates and patient details to ambulance driver,police and admin which will be connected to all. Hence, it is able to locate and reach patients in the proper time.

Blood Bank Management

This web page will provide common ground for both parties like client and blood donors and will ensure the fulfillment of demand for blood for blood that requested by client. It can be used to view all blood donor details. The registered user can also check the required availability. This process provides the required information in less time and also helps in quicker decision making.
